

Patient Name: Rahul Sharma

Blood Test Report:

Hemoglobin: 11.2 g/dL (Low)

Vitamin D: 15 ng/mL (Deficient)

Cholesterol: 240 mg/dL (High)

Interpretation:

- Low hemoglobin may indicate anemia.
- Vitamin D deficiency may cause fatigue and bone weakness.
- High cholesterol may increase cardiovascular risk.

Recommendation:

Consult a healthcare professional for proper evaluation.

Maintain a balanced diet and regular exercise.
